

MADISON'S GOAL

Madison's goal is to optimize your cat's health and happiness at a low cost to you. Pets require a considerable amount of veterinary care throughout their life.

Madison Veterinary Hospital is committed to providing you & your senior cat a variety of services including routine and unexpected circumstances.

This includes, but is not limited to, physical examinations, the necessary immunizations & parasite control & prevention.

We have created this senior plan (level 1) to provide you with optimal care at a premium discount. This will allow you to have peace of mind during the next 12 months of life.

We want nothing more than to help your senior cat to stay happy & healthy.

Madison's 12-body System, **GOLD** Standard Physical Examination far exceeds the "basics" done elsewhere. It is very important for your pet to see his/her veterinarian twice a year since pets rapidly age 7 years to every human year!

- ***Urinary & Genital Systems***–Evaluation of the reproductive organs & tract
- ***Neurological System***–Assessment for evidence of cranial or spinal cord dysfunction

Senior Feline—Level 1- With Prevention 12-Months Of Routine Services

Two Wellness Senior 12-body system GOLD Standard Physical Examinations **\$134.98**

Physical Examination to ensure a healthy adult. The examination performed by the veterinarian is extremely important to detect any abnormalities to the external parts of the body. Twice a year examinations are necessary due to the rapidly aging process in our pets.

Senior Immunizations **\$65.00**

Routine Immunizations
One 3-year Rabies, Rhinotracheitis or the Panleukopenia Immunization
One Leukemia Immunization
* this is based on your pets requirements*

Annual Anti-body Heartworm Test **\$66.50**

This is a blood sample, performed annually to diagnose the presence of heartworm disease transmitted by mosquitoes.

Major Blood Profile **\$132.00**

In addition to a cell blood count and a basic serum chemistry, this test will check more extensively on the values to assess the liver, pancreas, calcium and cholesterol.

Full Thyroid Profile **\$136.50**

Hyperthyroidism is a common disease found in older cats. A full thyroid profile looks at several hormones that are related to the thyroid gland to determine those cats that have hyperthyroidism or are developing the condition.

12-Month Supply of Prevention **\$203.10**

Topical prevention for external and internal parasites including prevention for heartworm disease.

Strategic Dewormings **\$27.00**

Recommended by the Center of Disease Control in Atlanta, for the removal of roundworms or hookworms that were undetected in the fecal screening. These worms can be transmitted to humans under certain circumstances.

Microscopic Intestinal Parasite Examinations **\$62.00**

Fecal screenings—A minimum of two are necessary in a calendar year to ensure a healthy senior pet.

Wellness Urinalysis **\$48.50**

Can detect crystals, infections, diabetes, kidney or liver problems. We consider this to be one of our most important tests.

URINE PROTEIN: CREATININE **\$62.50**

This is a sensitive test to check for protein in the urine. Proteinuria can indicate several inflammatory conditions; it also can be a very early marker for kidney disease.

Cardiac Pro-BNP Blood Test **\$109.00**

Pro-BNP is an enzyme that is produced by heart muscle. When elevated it can indicate that the heart muscle is stretching and could be related to heart disease. This is a good quantitative way to screen for heart disease.

**ELECT FOR THE
MONTHLY PAYMENT
PLAN OPTION!**

When electing the Senior S.A.F.E. Plan (Level 1) with Prevention, there is a \$100.01 deposit then affordable monthly payments of \$58.01 over the next 11 calendar months.
