

MADISON'S GOAL

Madison's goal is to optimize your cat's health and happiness at a low cost to you. Pets require a considerable amount of veterinary care throughout their life.

Madison Veterinary Hospital is committed to providing you & your senior cat a variety of services including routine and unexpected circumstances.

This includes, but is not limited to, physical examinations, the necessary immunizations & parasite control & prevention.

We have created this senior plan (level 2) to provide you with optimal care at a premium discount. This will allow you to have peace of mind during the next 12 months of life.

We want nothing more than to help your senior cat to stay happy & healthy.

Madison's 12-body System, **GOLD** Standard Physical Examination far exceeds the "basics" done elsewhere. It is very important for your pet to see his/her veterinarian twice a year since pets rapidly age 7 years to every human year!

Senior Feline—Level 2- With Prevention
12-Months Of Routine Services

Level 2 Includes All The Basic Services In Both Adult And Senior Level 1 Package Plans

\$738.12

*Two Wellness Physical Examinations
 One 3-year Immunization (Rabies, Rhino-Calici-Panleuk)
 One Leukemia Immunization
 Two Microscopic Intestinal Examinations
 Two Oral Strategic Dewormings
 A Wellness Urinalysis
 The Annual Anti-body Heartworm Test
 12 pack Of Heartworm Prevention
 A Wellness Major Blood Profile
 A Full Thyroid Profile
 Urine Protein Creatinine Ratio
 The Cardiac Pro-BNP Blood Test*

Electrocardiogram

\$60.00

EKG helps assess the heart rhythm, to determine if there are any arrhythmias or enlarged chambers to the heart.

Blood Pressure Measurement

\$29.00

Blood pressure is a way to determine if the pet has hypertension and in need of medication. Hypertension can be related to several conditions which older pets can develop such as heart or kidney disease.

Three Chest Radiographs Including Interpretation From A Boarded Certified Radiologist

\$297.50

Chest radiographs help determine the size of the heart and pathology of the lungs. These radiographs will also allow us to assess the integrity of the trachea and thoracic lymph nodes. Chest radiographs are also a good metastasis check, determining if there are any masses within the lungs.

Two Abdominal Radiographs Including Interpretation From A Boarded Certified Radiologist

\$258.50

Abdominal radiographs help the doctor assess organ size and positions. Radiographs of the abdomen also included the spine, which is a good screen for position and bone changes. We will look for unusual findings in the intestines and urinary system and this is also a way to monitor for masses.

Major Blood Profile

\$132.00

In addition to a cell blood count and a basic serum chemistry, this test will check more extensively on the values to assess the liver, pancreas, calcium and cholesterol.

**ELECT FOR THE
 MONTHLY PAYMENT
 PLAN OPTION!**

When electing the Senior S.A.F.E. Plan (level 2) with Prevention, there is a \$200.00 deposit then affordable monthly payments of \$72.84 over the next 11 calendar months.
